RFR-IMS-HANDHELD

INVENTORY MANAGEMENT SOLUTION

The RFRain Handheld Inventory Management Solution (RFR-IMS-HANDHELD) includes everything you need to start monitoring your inventory right out of the box. Benefit from significant cost savings as the RFID in a box is designed and developed to be a seamless integration of hardware, software and cloud solution/server on premise.

Key Features & Benefits

> Customers do not have to research multiple vendors with the hope of integrating a functioning RFID solution.

> Experience the benefits of inventory tracking and asset management within a matter of days.

> The RFR-IMS-HANDHELD includes the RFR-RAIN-1-HANDHELD Reader, RAIN tags and the RFR-ZM-MOBILE and RFR-ZM-ENT-AM software to start reading tags out of the box.

> 6-month of RFR-ZM-ENT-AM Asset Manager Cloud included.

> 6-month RFR-ZM-ENT Cloud support to track assets from anywhere included.

Applications

> Inventory Management

> Asset Tracking

> Library Management

> Warehousing

> Retail

> Conveyor belts

OVERVIEW

The RFR-IMS-HANDHELD offers a complete end-to-end UHF solution including all required hardware and software needed for customers to track and store IoT data in the cloud and to analyze it for their business purposes. The solution uses passive UHF RFID technology, and offers the most cost-effective solution for mobile inventory taking. The front-end software called the Zone Manage Mobile Software offers a plethora of services including the ability to interface with SaaS or other databases.
