- Customize your email or text alerts based on specific events.
- Multi-level secure access available.
- Additional options such as Order Accuracy Manager, Fast Track capabilities.
- Supports the RCI protocol.
- Store data securely in cloud.

### Applications

- Any application that needs access to data 24/7 using the RFRain Cloud.

### OVERVIEW

The RFRain Zone Manager Enterprise (RFR-ZM-ENT) is an advanced web-based control center, which allows users to configure, monitor, and control in the cloud the RFRain RFID network. In addition, the RFR-ZM-ENT allows real time updates to the cloud or to the LAN, and allows users to receive customizable alerts via text messaging and email. The Zone Manager Enterprise supports advanced options such as Order Accuracy Manager to prevent shipping errors and can customize features based on your business needs.
